

10 weeks, 10 families... One family wins for participating!

Hi, this is Amber. Thanks for helping with this project!

Focus comes in pearl or graphite colors

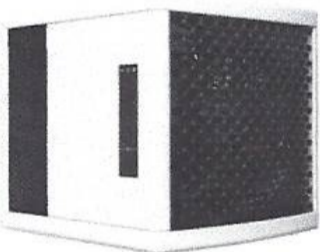

Evaluate this *FreshAir Focus*  for one week and "just pass it on."

It couldn't be easier. Plug your *Focus*  into a bathroom or closet outlet or near a moldy or smelly problem area.

Any small area becomes cleaner, fresher & healthier. Up to 50 square feet, including most hotel rooms. Hint: Never travel without a *Focus*. Do our "just pass it on" test for 7 days, write your comments, call your Trial Host (info below) to enter your name in the drawing, and pass this Trial Pack to a friend or neighbor who will do the same.

Not every transfer happens in exactly 7 days. People are people and life gets in the way of minor projects like this. In 10 to 12 weeks one of the registered families will win this 'slightly used' \$50 gift. No pressure at any time, but every test family has the option to earn a free Focus if they order a room/apartment system (*FreshAir Box*) or 2 free Focuses if they order a home system (*FreshAir Surround*).

Vollara air/surface purification technologies have been shown to kill 96% to 99% of molds, viruses and bacteria. As an example, the room and home units have been shown to kill 98% of E-coli on toilet flush handles. Your nose will tell you it has cleaned the air!

FreshAir Box, in pearl or graphite, cleans up to 1,500 square feet and retails at \$350. The ultra lightweight *FreshAir Box* can be wall mounted (bracket \$10). Thin black cord extends down to transformer and outlet. Remote included.

FreshAir Surround ('Everest' in California and Canada) cleans up to 3,000 square feet and retails for \$750. Surround and Everest are Certified by the Space Foundation and have been validated by testing at Kansas State University and the University of Cincinnati. *FreshAir* purifiers are highly effective, easy to clean and ultra quiet. Remote included.

Pass this laminated letter to the next trial home...someone who will do my "pass it on" project.
If you want a copy I will bring one with your home demo unit. — Amber
