## It's Crunch Time

The sooner you decide that Baby Boom #2 can be used to your advantage, the better your chances will be at cashing in.

Visit [www.chippynews.com](http://www.chippynews.com) (Million Friends website) when you finish reading this flyer. Everything presented here is covered.

## Vollara is...

...A Dallas-based company with a rich history and big future. We manufacture products to make people's lives healthier, safer and more environmentally attuned and we have LOTS of room for growth. ...A network marketing company that allows its distributors to be fully active for only \$37.50 per week (one tank of gas for a small car). ...A company with experienced owners and unlimited potential.

panel 3

## Vollara Products

Our strongest divisions are indoor air and surface purification, water ionization, laundry water processing and enzyme-based nutrition products. But the most exciting product we offer is the Vollara opportunity.

## Air and Surface Purification

Filterless air purification dates back to 1986. Under 3 other labels prior to Vollara, we sold millions of air purifiers in the US and around the world. This technology makes living and working spaces cleaner, safer and healthier.

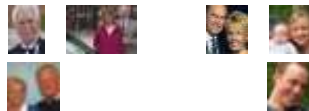

The **LivingAir** technology kills bacteria, mold and viruses not just in the air but on countertops, door and flush handles and other environmental surfaces.

**Our Gold GMI level pays a minimum bonus of \$2,300 in each 28-day pay cycle:**

### Each GMI Level Requires...

**Volume, Sub-leaders and Left/Right Balance**

No credit check - Approximately \$650 down for the big starter pack. Balance on 30-60-90. 23% below wholesale.

panel 4

## Water Ionization

All cells naturally produce acidic waste. To make things worse, bottled water, soft drinks and coffee are acidic. All that acid must be transported to the kidneys and colon for removal. But delicious, healthful, alkaline water can be made at home by electronically dividing water into its alkaline and acid parts. We drink the good water and fill our own bottles with it for just pennies.

## Food-based Nutrition

Our labels tell the story. You will find fruits, vegetables, algae, probiotics, chelated minerals —the best nature has to offer. We also add CAeDS which stands for Chelate Activated Enzyme Delivery System. CAeDS enables better digestion and absorption from the foods we eat as well as from our supplements!

With half a dozen working sub-leaders you can qualify as Gold and be approaching Platinum where the GMI and car bonuses come to \$4,300 or higher. There are bigger ranks, of course. No ceiling.

panel 5

## LaundryPure

It's hard to imagine a more environment-friendly product. **LaundryPure** customers use zero detergent and usually no dryer sheets or softeners. **LaundryPure** uses the same space-age ideas that are in our air purifiers. Clothes come out bacteria-free, soft, color-safe and clean. We save up to 31 cents per load on detergent cost and more on electricity because **ONLY COLD WATER** is used.

*My favorite products are the **LivingWater**, the nutrition, **FreshAir** and **LaundryPure**.*

*One day my husband asked if I would stop drinking the water to see if my migraines came back. I said I would do a lot of things for him but that was not one of them. If our teenager could have only one, she'd pick the muscadine antioxidant juice, **Re:Plenish**. Antonina dislikes eating vegetables but she loves the grape juice.*

*I make bottles of water for our family to use every day, we take it on trips and even our Chihuahua loves it. When she stays with my neighbor she won't drink their water. As soon as we bring her home she runs to the kitchen and drinks, drinks, drinks. — Mila Giddens, Orlando*
