

For a Better Life...

Essentials For Life (far right) is like buying 5½ individual products and taking the full recommended dosage at about a third the cost. Because minerals take up so much space in the capsules, the chelated minerals are provided at half the recommended dosage. There is no product like this! EFL is a whole food, vegetarian product, including the capsules. Digest-A-Meal is a fantastic, broad spectrum enzyme product with zinc and manganese. LifeForce SuperAntioxidant is a powerful, all-whole food blend of the finest and most powerful antioxidants and mineral support that helps the body create its own super oxide dismutase (SOD), a powerful internal antioxidant. Flora Support is an amazing blend of 12 strains of stabilized probiotics. It would be hard to find a comparable in a health food store for \$60 (just this one part of EFL). The chelated, vegetarian sourced minerals are also very exceptional. For families that don't eat enough fruits and veggies, this is the answer. For growing youngsters and athletes, this is the one. For old and sick people, this is the product your body needs. Other products in the Infinity2 line are just as exceptional.
