

Living Water Essentials
PRE-OPERATION CHECKLIST

Distributor's Name _____ Phone # _____

Date _____

Owner's Name _____

Address of Installation _____

City _____ State _____ Zip _____

Phone # _____ Best time to call _____

INSTALLATION LOCATION

- KITCHEN
- OTHER _____

INSTALLATION PARTICULARS

- STANDARD FAUCET FOR CONNECTION
 - SEPARATE COLD WATER FAUCET FOR CONNECTION (HARD WATER)
 - EXOTIC FAUCET, HOW TO CONNECT?
- COMMENTS _____

WATER SOURCE TYPICAL FOR AREA _____

- PRIVATE WELL MUNICIPAL OR RURAL WATER UTILITY

WATER PRESSURE

- 50 UNDER OR AT PSI. Above 50 PSI will damage unit.

WATER PROPERTIES

- pH of source water _____ Resolve with: _____
- hardness
- chlorine
- sediment
- OTHER CONCERN _____

PARTS LIST :

From the Owner's Manual— The quality and content (types of minerals) of the source water provided to the water ionizer has a direct affect on the quality of the ionized water produced. This is true of ANY water ionizer.

Municipal tap water typically has a pH value between 7.1 and 7.3 and a moderate water hardness (between 80 and 140 parts per million).

Such water will generally result in the production of high quality ionized water. Water supplied from other sources may vary considerably in quantity and content.

Low pH water (typical of some well water) may require an additional re-mineralization cartridge to enhance water ionization.

To find a complete list of accessories and test instruments click on Email Central on the Chippy News website www.chippynews.com

Deluxe Test Kit

Contents	US40887	\$ 299.00
Ph Meter		
TDS Meter (like the ones from the Ultra)		
ORP Meter Digital		
Pump Set Up		
Demo Carry Case		
1 Demo Water Box		

Standard Test Kit

Contents	US40886	\$ 199.00
Ph Meter		
TDS Meter (like the ones from the Ultra)		
ORP Meter Digital		
Demo Carry Case		
1 Demo Water Box		

Test Strips that are easy to find but not available from EcoQuest

Hardness and Chlorine—Hach AquaChek Dip-and-Read Water Quality Test Strips; Multiparameter; 5 Tests on each strip—Free Chlorine, Total Chlorine, Total Hardness, Total Alkalinity (as CaCO3/Calcium Carbonate) \$12.95 for 50 test strips.

Test body pH (urine and saliva) - Hydriion pH Paper from Micro Essential Laboratory Inc reads acid range (below pH 7) and alkaline range (above pH 7). 100 tests as low as \$7.50 min quantity is 5. <http://www.microessentiallab.com>

Home stores and hardware stores often carry the water test strips but they will be less expensive online. Some health food stores carry the pH test strips.
