

# LivingWater

Product #9920002 - Retail \$1,999.99 - PV 1,000

Package deal: Is available to new distributors for 14 days as part of the **Fast Start Essentials Plus Pack**

## Overview

### Not All Water Is Created Equal.

Drinking enough water isn't really enough. You have to drink the right kind of water - water that will help buffer acid, help remove toxins, and is easily absorbed by your body. You need great tasting water with antioxidant properties and proper pH levels.

Having a LivingWater is like owning a limitless supply of alkaline, ionized, healthy water. You get pH-balancing, healthy alkaline water for drinking and cooking, strong alkaline water for washing vegetables, and acidic water for cleaning. Plus, when you drink alkaline water regularly, you're helping your body to hydrate itself as well as flush out toxins and waste products. If you're trying to lose weight, you may get a boost there as well. Overall, there's no better way to help stay healthy.

Utilizing Direct Disk Ionization (DDI) Technology™, LivingWater is a revolutionary approach to water ionization. Designed by the inventor who holds the first water ionization engine patent, it does not require numerous plates or membranes. While conventional units require a low flow rate to maximize ORP (Oxidation Reduction Potential), LivingWater with Direct Disk Ionization (DDI) Technology™ can achieve the same ORP levels at a higher flow rate. The Direct Disk Ionization Technology and constant power output design produce ionized water with the least amount of electrical energy needed. Similar to a compact fluorescent lightbulb which uses less energy for the same amount of light output as an incandescent bulb, LivingWater is a more efficient use of energy than conventional plate units.

### Benefits of LivingWater

- Provides acid-buffering alkaline water for drinking and cooking, right at your faucet
- Produces acidic water for cleaning without chemicals
- Generates water with excellent negative Oxidation Reduction Potential (ORP) for increased antioxidant properties
- Installs to your existing faucet with no special plumbing

### Typical Customer Comments

- ☆ "It installed in minutes. My husband watched the installation video and had it running in ten minutes. Other than our kitchen scissors, he didn't need any handyman tools."
- ☆ "My regularity improved by the second day. It was wonderful."
- ☆ "The alkaline water idea makes total sense and it tastes great. I'm not surprised by the amazing gout, diabetes and other health stories we have heard."
- ☆ "When we learned that almost all bottled waters are acidic, that was the final fact that sold us. Now we bottle our own delicious water for just pennies per bottle."
- ☆ "I had stopped drinking water. I drank only iced tea and soft drinks. With LivingWater it only took me a few days to get back to loving water."

## Features

- ☆ A patented constant power output design monitors the TDS level of the source water and automatically adjusts accordingly to maintain a constant pH level.
- ☆ LivingWater is designed to operate with low or high TDS water, even with the TDS is in the thousands.
- ☆ Accidental use of hot water will not harm the unit as there are no membranes. A unique water-cooled power supply allows for continual operation without risk of overheating. Most conventional plate ionizers can only operate for a limited period of time before they must be shut off in order to cool down.
- ☆ LivingWater offers 8 different pH levels, ranging from 4.0 acidic water to 10.0 alkaline water plus a SUPER function to achieve extreme pH levels when needed.
- ☆ LivingWater features a reusable mineral port for use with common sea salt for enhanced mineralization for higher levels of pH.
- ☆ An easy to read, multicolor LCD control panel keeps track of performance particulars, including total liters produced, life indicators, and pH setting. Each pH setting changes the background color of the LCD
- ☆ LivingWater is water resistant: splashes and spills will not harm the electronics.
- ☆ Easy to install with only 2 connections: water in and drain out. The unit can be installed to the left or right of the sink, without any adjustments.
- ☆ A unique Switching Mode Power Supply makes LivingWater safe and ready for international use. The unit can be plugged into 100v, 110v, 220v or 240v without any adjustment. A country specific plug adapter is all that is needed.
- ☆ Water passes through two filters before ionization occurs:
  - A carbon and sediment filter removes unpleasant tastes and odors from the water.
  - The second filter is a carbon and food grade calcium sulfite filter to ensure proper mineralization of the water using good calcium.
  - Filters can be easily removed and replaced with a simple twist and lock design.
- ☆ Easy maintenance. An automatic cleaning cycle activates after every 12 minutes of use. Annual cleaning can be performed at home with the port adapter and cleaning kit.
- ☆ With proper care and maintenance, the LivingWater provides a longer service life than conventional plate units and features a 5-year limited warranty.

## Living Water Specifications

Electrode Type	Titanium steel w/platinum
Water Filtration	Two filter system
Filter Life	10,000 liters
pH Range	2.0 ~ 11.0+ depending on water source conditions
ORP Range	+500mv to -400mv
Size	10.8 in. wide x 12.4 in. high x 5.5 in. deep
Weight	(lbs.) 8.1
Water Temp	39° F (4° C) to 95° F (35° C)
