

Option 1 is Ruby

# The Right Choice for You?

Some people initially say no and later change their minds when they see your progress. Your belief level and commitment are the keys.

Serious Career

## Option 1

**5 solid\* legs: smallest weekly check a Ruby and earn is \$1,800! Serious money.**

Ruby requires a "wide" network. You must recruit 5 good people

(signified by ★ ) who build solid, growing legs. A Ruby's annual income can grow to \$390,000.

A top Vollara leader predicts:

***"A Ruby foundation can be built within 1 year. You'll then invest a couple more years to solidify a respected and lasting career."***

\* To be solid, a leg must contain leaders and it must be growing. A leg that contains 5 active distributors might be strong. A leg with 25 active distributors can't miss. A key to leg strength is to have 1 serious leader for each 10 active people.

Comfortable option for busy first timers.

## Option 2

**Earn \$1,000 or more per week with 2 legs.**

**TELL 2...**

WHO TELL 2

WHO EACH TELL 2

WHO TEACH THIS SAME IDEA DOWN THE LINE

Keep it going. When your **Red** and **Green** legs each do 10,000 PV in a week, your check will reach \$1,000. Any combo of orders (all levels) will suffice. Ten water ionizers in each leg will do it. At 40,000 GV (20,000 in each leg), \$2,000 per week is earned.

**"All In" in every way... Massive!**

## Diamond +

**Each rank offers more money and extra perks. To reach the very top\*\*, build 22 strong legs—a huge challenge. You'll work harder than you have ever worked in your life.**

\*\* Level 20 requires 11 massive legs. Hint: Double the goal to 22. Why? Because attrition is a fact of life. Good networkers double their leg goals to protect against slippage.

### Which Options fits your needs and dreams?

We checked some celebrity incomes Online. If that source is correct, a Level 20 Vollara leader would earn about what **Clint Eastwood, Tom Hanks** or **Brittney Spears** earns. Only the most committed make it to the top (as in anything).
