

# Rare Demographic Pattern

*that will NEVER be seen again...*  
Understand what this pattern means. Reap rewards for the rest of your life.

Post WWII →  
**Baby Boom**  
1946 to 1964; 78 million

Today's Young People →  
**Echo Boom**  
1980 to 1995; 60 million

**The best timing ever...**

- The recession will end (we can't change the past, but we can learn from it)
- The Echo Boom will have its impact (the best timing is now)
- Eventually it will crash, as the Baby Boom did (2032 if the pattern holds, but with ups and downs along the way)
- Some people will catch this wave; some will miss it. How about you?

Source: Wikipedia  
US births from 1933 to 2004

**Now that YOU know...**  
*won't your friends want to know?*

(if you are over 50, this is your last chance; if you are under 50, you'd be crazy to miss this)

Every friend has to be told as a matter of loyalty. This is too important to hold from them.

One ambitious and talented recruit is worth 20 who are not motivated. Quantity is important; but quality is better.
