Battelle Memorial Institute, an 80-year old research group (Columbus, OH), does research in national security fields; energy, transportation, health sciences and environment ...serving 800 government agencies, some of the largest corporations in the world; and private sector partners in more than 100 locations around the globe. They manage a staff of 20,000 and operate a \$3.9 billion annual budget. Among their credits are nuclear power research, the first Xerox system, astronaut foods, CD disk technologies, fiber optics and photovoltaic cell development. The Top Ten report cited here was published in 2001.
