Indoor Air Quality Survey

THANK YOU, for your participation in our Indoor Air Quality Survey. Your input about our Living Air Electronic Air Purification System will assist us in developing future products and programs for this segment of our market.

As you may or may not know this insidious problem called "Sick Building Syndrome" is a world-wide problem affecting us in the areas where we work, play, and live. EcoQuests Proprietary RCI (Radiant Catalytic Ionization Technology works synergistically to produce our air purification results. (It has been referred to by some as the LIVING AIR "MIRACLE")

For your part in this process we ask only that you use the system in your office or residence, making comments on the survey as you use the unit around your house. Please return the completed form (as much as you can) in the mail or fax to 561.658.8197 to your EcoQuest Representative at the end of the "trial". You will receive your Free Gift (\$85.00) in the mail within 4 weeks.

It is our way of saying "THANK YOU" for your participation

**PLEASE SEND MY FREE GIFT CARD (\$85.00 choice of gifts):

Indoor Air Quality Comments

Each day indicate a positive change (+) or negative change (-), no change (NC).
 Also note any changes in your indoor environment, the way you feel, sleep, etc.

**Example: Day 1 (+) Cat litter box odor gone, Slept better after sanitizing bed
 (-) Smell seemed strong at first, but now OK**

DAY 1: slept Better than I have in a long time
 I didn't wake up choking only coughing.
 - odor a little strong

DAY 2: slept through the night!!! House smells
 Better. odor Better.

DAY 3: Turned up machine still sleeping through
 The night. Finally feeling rested!! odor a little strong

DAY 4: Prefer to stay indoors with the fresh air
 than outside with allergens. sleeping great!

DAY 5: granddaughter can breathe better wants
 me to get one for her house

DAY 6: my husband is noticing a fresher smell
 in house, wants a smaller unit just for our
 bedroom
